Accuracy Skills Test

The Accuracy Skills Test, or AST, is a skills assessment that measures an individual’s ability to spot mistakes and errors, and check for accuracy in text and numbers.

RESULT

1 – 3 Low	4 – 6 Effective	7 – 9 Enhanced
The participant might find it difficult to spot errors in sets of data. He/she is likely to make more mistakes than others when having to retype information.	The participant should not find it too difficult to spot errors in sets of data. He/she is likely to make fewer mistakes than others when having to retype information.	The participant should not find it difficult at all to spot errors in sets of data. He/she will probably make no or very few mistakes when having to retype information.

Disclosure

Purpose: The purpose of this report is to indicate the test-taker's results on various skills, aptitude, potential and behavioural attributes. This report is for the attention of the manager who requested the assessment and remains the property of AssessmentHouse. This report may not be shared with any individual or company who is not trained in psychometric testing or have been authorised through informed consent by the test-taker and supervising psychologist.

Disclaimer: Since the report contains **confidential** information it needs to be dealt with accordingly. Consequently this report **may not be handed over to the participant**. It may also not be used as evidence in a disciplinary hearing. Should this report or the content of the report be handled or communicated incorrectly by any party within the company, AssessmentHouse cannot be held liable for any claims resulting from such action.
