## MECHANICAL SKILLS TEST

John Smith  
(30/01/2017)

## Mechanical Skills Test

The AH Mechanical Reasoning measures the understanding of the basic physics principles and mechanics, as well as the ability to visualise the movement of objects and the cause-effect relationships between mechanical components.

### RESULTS INTERPRETATION

<b>1 – 3 Low</b>	The participant might find it difficult to understand and visualize the movement of objects and cause-effect relationships between mechanical components.
<b>4 – 6 Effective</b>	The participant might should understand and visualize the movement of objects and cause-effect relationships between mechanical components.
<b>7 – 9 Enhanced</b>	The participant should find it very easy to visualize the movement of objects and cause-effect relationships between mechanical components.

## Disclosure

**Purpose:** The purpose of this report is to indicate the test-taker's results on various skills, aptitude, potential and behavioural attributes. This report is for the attention of the manager who requested the assessment and remains the property of AssessmentHouse. This report may not be shared with any individual or company who is not trained in psychometric testing or have been authorised through informed consent by the test-taker and supervising psychologist.

**Disclaimer:** Since the report contains **confidential** information it needs to be dealt with accordingly. Consequently this report **may not be handed over to the participant**. It may also not be used as evidence in a disciplinary hearing. Should this report or the content of the report be handled or communicated incorrectly by any party within the company, AssessmentHouse cannot be held liable for any claims resulting from such action.
